The smoothest operating retractable screen door available

Screens that stay out of your way

Unlike traditional swinging screen doors, the Mirage Retractable Screen is only across your door opening when you need it to be. Additionally, because the screen is stored out of sight when not in use, it will not detract from the appearance and beauty of your entry door.

Keep insects out

Warm seasons are a time when we want to open our doors and let the fresh air in. Don't let insects stop you from opening your home to the outdoors.

Quality you can count on

Proudly manufactured in North America, Mirage uses only the highest quality components and finishes. From the internal bushings to the powder coated aluminum, Mirage screens are built to last.

Features that make a difference

Meet simplicity with the Mirage *PivotPro* Easy Release Handle. An innovative design that allows for easy opening of the retractable screen with a simple twist.

Teflon infused pull bar guides that pull the screen across the top and bottom tracks are designed to reduce the chance of friction.

Mirage's proprietary brass bushing allows the roller tube to spin easily and increases the longevity of the screen.

The factory balanced roller tube spins in a steady and stable manner when the screen mesh is pulled across your opening.

Available with the patented *HydraGlide* speed reducer to prevent accidental slams.

Cool and ventilate your home

Enjoy the comfort of fresh air during the cool of the day and reduce the cost and need for air conditioning.
